

Showing/Hiding Your Canvas Courses on the Dashboard

Canvas displays up to 20 courses on your Dashboard, including current, imported, sandbox, and training courses. To avoid clutter and confusion each term, designate your “Favorite” (★) courses and hide the others! (Hiding a course does not delete it.)

1. Open Canvas (<https://canvas.bw.edu>) – it defaults to your Dashboard.
2. From the left side navigation, click on “Courses” and then “All Courses.”

3. Click the Star (★) before each course you want to display on your Dashboard.

In this example, I’ve clicked the star on four of my courses. When I return to my dashboard, these will be the only courses displayed. The other courses will now be hidden (but not deleted).

Return to the courses menu at any time to change which courses you’d like to display on your Dashboard.
